Wish that your email list system did a better job of making it clear that the message is from a list instead of Sarah's name -- maybe it should read CCLC and use a dummy address that bounces back if someone replies to it. As it is now, it is just too

easy to forget and hit reply and then everyone is stuck reading the message -- or else a message that was meant only for Sarah gets distributed to the list. I have been on mailing lists since 1990 and this is the first time I have seen one set up like this. I really hate it and would get of the list if I could, but my job requires that I stay on it.

Many thanks to the EAR committee for your good work!

Thanks for checking into the First Search/OCLC World Cat deal that the State Library is giving free to Public Libraries. To continue involvement in our Library Systems' delivery services, we (CCCs) need to have a similar deal

Thank you for this invaluable service.

I think you all are doing a fantastic job of 1- eliminating excess paperwork. 2- the website puts all of the information I need (offers, statistics) in one place 3 - keeping subscription rates down. These things are most important to me. One thing - it would be great if there was a page on the website that listed all of the vendors' tech support contact information in one place (maybe with check boxes, to select a print out of vendors each college subscribes to?) I know this is asking a lot, but I think it might be a feature everyone would appreciate.

thank you for the services. very helpful.

I am less likely to subscribe to databases that can't be authenticated by vendor supplied username and password. Our campus IT can't provide campus authentication that some vendors require and off site access is extremely important to our students.

You're doing a great job! Keep those great price breaks coming!

WestLaw is the only dbs the district pays for outside of TTIP funds. If we ever lose TTIP, we will have to drop them all, the district will not be able to afford access. I really appreciate the CCL not just for pricing but also for the time-savings to me in identifying quality online products. I do not have the time to really look at them. The free trials help a lot, too, I do get feedback from faculty and students on what they like and don't like. CC librarians don't seem to have much time, but I wd like to see more communication on other topics to build our unity. not sure if this is the CCL's role but we all seem so separated.

It will be nice to have the ordering process clarified.

I have a collection development librarian on staff who evaluates the databases and makes recommendations to the reference staff.

I've always been interested the work of the CCL-EAR committee, yet rarely see opportunities to join. Are there opportunities

for librarians, and if so, how do we join?

Hello Sarah! We will be subscribing to EZ Proxy this Fall subscription cycle.

Date/Time: 9/26/2005, 15:19:16

The CCL Consortia is great and it allows us to buy things cheaper. I would like to see more programs where we could go to a meeting or a workshop and all the vendors would be there like at an exhibit. I don't get to the conventions so I don't get to see these vendors but that would be nice.

Date/Time: 9/28/2005, 8:14:58

Thank you for all your great work and effort. We do appreciate it.

Would CCL Consortium to consider: 1) additional e-book vendors packages, and 2) e-journal packages from publishers-- especially packages more specifically targeted to vocational areas
